

**TECHNICAL BULLETIN**

**FQE® General Odor**

General deodorant for rapid removal of malodors

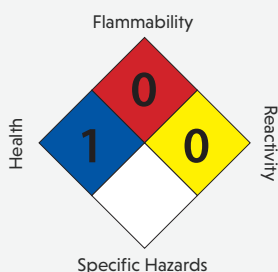

**Product Data**

Bulk density	8.4 lb/gallon 1000 kg/m <sup>3</sup>
Solubility	Complete in Water
Flash point	> 200°F (93°C)
Approximate storage life	1 year

**Standard Package**

55 US gallons (208 litre) closed head poly drum, tote bin, or bulk.

**FQE® General Odor is a specially formulated mixture of environmentally safe compounds designed for odor control associated with refuse, waste treatment, paper processing, rendering and other industrial processes.**

FQE General Odor is a clear, water white liquid with no aroma of its own. It is non-hazardous, non-flammable and safe for applications in areas of personnel activity. The product is an active system that eliminates malodors immediately and effectively forever. FQE General Odor works by a selective chemical process that prevents the malodorous chemicals from being detected by the human olfactory system.

**Application**

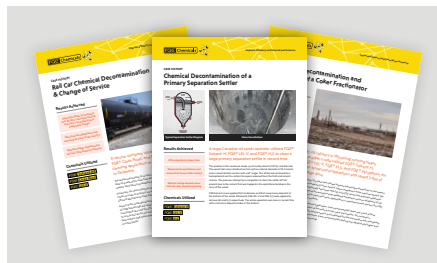

FQE General Odor can be applied by any convenient atomizing spray method or by injection into process streams. Effective odor control can be expected immediately following application of the product with complete odor elimination within hours. FQE General Odor is recommended for use in landfills, transfer facilities, water treatment ponds or lagoons, dumpsters, sludge streams, drains and other odiferous areas. FQE General Odor does not present any hazardous disposal issues. Standard methods of disposal can be utilized.

**Dilution**

FQE General Odor is typically applied in diluted form. It can be diluted in water at dilution ratios up to 1000:1 depending on the concentration and source of the odor present. Contact us for specific recommendations.
