

**TECHNICAL BULLETIN**

**FQE Scale-Solv SS**

Effective in the cleaning of scale such as iron oxides, water salts like calcium carbonate and various other inorganic scale deposits.

**Product Data**

Bulk density	9.64 lb/gallon 1156 kg/m <sup>3</sup>
Solubility	Complete in Water
Flash point	> 200°F (93°C)
Approximate storage life	1 year

**Standard Package**

55 US gallons (208 litre) closed head poly drum, tote bin, or bulk.

**FQE® Scale-Solv SS is a premium cleaning compound for use in removal of various inorganic scale deposits common to refinery and utility operations.**

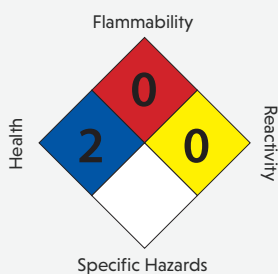

This product contains an organic acid and corrosion inhibitors to aid in soil removal. It contains no chlorides and is suitable for use on stainless steel metallurgy. It is especially suited for removal of iron oxides and water salt deposits such as calcium carbonate.

**Application**

FQE Scale-Solv SS is added to the system to be cleaned during the routine cleaning procedure. The product may be used via circulation, foam or vat soaking.

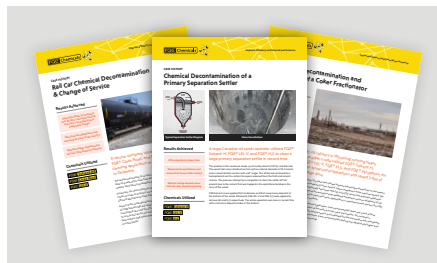

**Dilution**

May be used at full strength or diluted 1% to 10% by volume with water depending upon the amount of fouling expected.
