

**TECHNICAL BULLETIN**

**FQE<sup>®</sup> Solvent-ME**

Water-based degreaser for dissolving high mole organics

Bitumen Coated Coupon  
Untreated

Results with 20% concentration at  
60°C (140°F) for 4 hours

**Product Data**

Bulk density	7.96 lb/gallon 954 kg/m <sup>3</sup>
Solubility	Dispersible in Water
Flash point	> 200°F (93°C)
Approximate storage life	1 year

**Standard Package**

55 US gallons (208 litre) closed head poly drum, tote bin, or bulk.

**FQE<sup>®</sup> Solvent-ME is a concentrated liquid solvent cleaner containing selected aromatic petroleum solvents together with a blend of anionic and non-ionic emulsifiers and penetrating agents.**

It is designed to be a high flash point emulsion solvent for difficult hydrocarbon soils. FQE Solvent-ME functions as a micro-emulsion system to suppress the flash point and give the product a non-combustible rating. A unique feature of FQE Solvent-ME is it will leave a water-wet surface following rinsing with water.

**Application**

FQE Solvent-ME can be applied by any convenient non-atomizing method. It should be used in areas with good ventilation and kept away from open flames. It can be added to solvents and solvent cleaners for improved solubilization of heavy tars and asphalt.

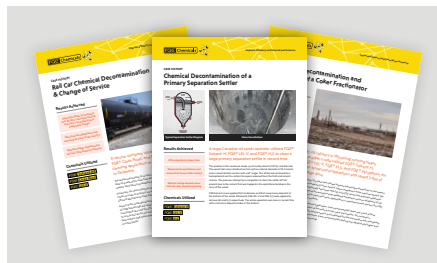

**Dilution**

FQE Solvent-ME can be applied in the concentrated form. For lighter soils, it may be diluted up to 50:1 with water or naphtha solvent.
